

# Office 365 Business Essentials to Business Premium

The easiest way to complete your Office suite

# Discover the best Office 365 Plan

Office 365 is best for productivity, collaboration and sharing with its anytime, anywhere access. It's equally perfect for the SMB and Enterprise markets with its tiered solutions and applicable features. But discovering the right Office 365 suite for your business is much more difficult, particularly if you have specific needs.

Moving to the Cloud doesn't have to be complex, though. With Office 365 Business Essentials, you can start with a new email solution from a 50GB mailbox and gain access to a host of other online features, including SharePoint and 1TB of online storage with OneDrive for Business. But for many, online access only just isn't enough.

The easiest way to complete your Office suite in the cloud is with Business Premium.

# Let's pinpoint the differences...

For when you need access to online and offline features, Business Premium is the most cost-effective option for the people you employ. It broadens your scope for productivity with Office for Desktop, gives you five installs on PC or Macs, as well as five installs on Tablets and Mobile devices, and still offers 1TB per user of storage space in OneDrive for Business.

# Introducing Microsoft Access

From January 2017, Microsoft has expanded the Office for Desktop app collection by launching Microsoft Access for all Business Premium users. As a database management solution, Access enables businesses to collect and store data on their own desktop without requiring any external support from their IT administrator. Not only is it easily accessible on Business Premium, but Access can track, develop and analyse data from multiple sources. From a simple customer contact list to a robust management system, the app is often the perfect fit for many SMBs.

# Increase business agility

As Microsoft continue to expand Office 365 and its features, your business can experience greater agility when communicating through the cloud. With Business Premium, you can take that experience and maximise it for better opportunities when at the office, at home, or while on the move from multiple installs on different devices. Connect to colleagues through Skype for Business or collaborate on the same Microsoft Word or Excel document at exactly the same time, no matter where you are. It's truly anywhere, anytime access.
